

April 25, 1955

Mr. Robert A. Day
Librarian Editor
Institute of Microbiology
Rutgers University
New Brunswick, N.J.

Dear Mr. Day:

Thank you for your message of the 21st.

In fact, I have tried to save a very few copies of all my papers for just such high-priority requests as your own and will send what I can under separate cover.

I am also enclosing a bibliographic list. I trust it will not be necessary to send you item # 39, and Dr. Nelson can give you #44. Items 9 and 16 are exhausted but have been reprinted in "Papers in Microbial Genetics" which is still in print (see enclosed circular).

I will keep the Institute (or Dr. Waksman) on my regular mailing list for future publications.

Yours sincerely

Joshua Lederberg
Professor of Genetics
